FISCAL IMPACT STATEMENT

LS 7770

BILL NUMBER: HB 1834

DATE PREPARED: Jan 18, 2001

BILL AMENDED:

SUBJECT: Research Expense Tax Credit.

FISCAL ANALYST: Diane Powers

PHONE NUMBER: 232-9853

FUNDS AFFECTED: ☒ **GENERAL**
☒ **DEDICATED**
FEDERAL

IMPACT: State

Summary of Legislation: This bill modifies the Research Expense Tax Credit by repealing the apportionment limit. (For a taxpayer with income apportioned to Indiana, this provision currently limits the credit to the lesser of the taxpayer's Indiana qualified research expenses or its apportioned research expenses for the year. This bill would provide that a taxpayer's credit is based solely on the taxpayer's Indiana qualified research expenses.)

Effective Date: January 1, 2001 (retroactive).

Explanation of State Expenditures: There will be some minimal expenses for the Department of State Revenue to change tax forms, instructions, and computer programs which can be absorbed in its current budget.

Explanation of State Revenues: *Apportionment:* The elimination of the apportionment factor could increase the amount of Research Expense Credits taken up to an additional \$5.2 M annually beginning in FY 2002. This modification would mean that the credit is based on the taxpayer's Indiana qualified research expenses, rather than the lesser of its Indiana qualified research expenses or its apportioned research expenses for the tax year beginning January 1, 2001. Currently, only businesses that do not have income apportioned to the state for a taxable year may calculate their credit based on only Indiana research expenses.

It is unknown how many Indiana businesses would be affected by this change. This change would not reduce the amount of credit that is currently taken by any particular taxpayer. This change would benefit Indiana domiciled companies that conduct a significant amount of their research in Indiana, but have apportionment factors for income earned in Indiana that is less than the percentage of their overall research expenses in the state. Elimination of the apportionment factor will allow all companies to compute their tax credit based on the amount of research conducted in the state.

With additional incentives created for research and development activity based in the state of Indiana, the revenue loss from this credit could increase by an indeterminable amount. The credit provides \$50,000 for each \$1 M in new research expenses.

Over the past six years, the current Research Expense Credit has ranged from \$7 M to \$15 M. In FY 96 approximately \$9.2 M of tax credits were claimed, with \$15.3 M in FY 97 and \$11.2 M in FY 98.

Increased expenditures on research activities could also generate additional Adjusted Gross Income and Sales Tax revenue if these expenses are used to hire additional employees or purchase related equipment.

The research expense tax credit affects revenue collections deposited in the General Fund and Property Tax Relief Fund.
